PROFESSIONAL SUMMARY

I am an ambitious ICT professional with a Diploma in ICT (Application Development) and an Advanced Diploma in Information Technology from Durban University of Technology, where I am currently pursuing my Bachelor of Information and Communication Technology Honours. My academic journey has equipped me with strong expertise in software development, database management, system analysis, and technical support, reinforced by hands-on experience through projects and practical work.

With a solid foundation in programming languages such as Java, C#, Python, and SQL, I enjoy building full-stack applications, working with complex databases, and solving technical challenges. I take pride in my problem-solving mindset, attention to detail, and ability to thrive both independently and in collaborative team environments.

Passionate about continuous growth, I am eager to contribute my technical skills, creativity, and dedication to innovative projects while advancing my career in the ever-evolving technology landscape.

EDUCATION

Name of Institution:	Durban University of Technology
Qualification:	Bachelor of Information and Communication Technology Honours (<i>In Progress</i>)
Name of Institution:	Durban University of Technology
Qualification Obtained:	Advanced Diploma in Information and Communication Technology (ICT)
Name of Institution:	Durban University of Technology
Qualification Obtained:	Information and Communication Technology (Application Development)

Name of School: Ixopo High School
Qualification Obtained: National Senior Certificate

CERTIFICATIONS

Cisco Introduction to Cybersecurity

Microsoft Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

Microsoft AI Fundamentals

Microsoft Generative AI

Microsoft Responsible AI

Microsoft AI and Accessibility

Microsoft Search Technology

Microsoft Copilot

WORK EXPERIENCE

PowerBrand:

Software Developer Intern - (March 2025 – To date)

- Assist in designing, coding, testing, and debugging software applications under the guidance of senior developers.
- Collaborate with the development team to analyze requirements and contribute to technical solutions.
- Support database management tasks, including writing queries and maintaining data integrity
- Participate in code reviews, documentation, and version control using tools such as Git.
- Contribute to improving user experience by identifying issues and suggesting enhancements.
- Gain hands-on experience with full-stack development, system testing, and deployment processes

Durban University of Technology:

Information Technology (IT) Tutor - (March 2025 – To date)

- Provided technical assistance and guidance to students on Information and Communication Technology (ICT) concepts including databases, Structured Query Language (SQL), and system logic
- Explained complex technical concepts in clear and understandable terms
- Facilitated problem-solving exercises and supported development of critical thinking skills
- Maintained professional standards, punctuality, and structured documentation practices.

PROJECT EXPERIENCE

Ramshelf - Resource and Inventory Management System

Project URL: <https://ramshelf.vercel.app>

Key Responsibilities and Achievements:

- Designed and delivered a full-stack resource management system to solve practical operational challenges
- Analysed business processes and user needs to define system requirements and specifications
- Built and optimized relational database structures using SQL
- Developed a secure and scalable Java-based REST API to support backend operations and data handling
- Implemented CRUD functionality with rigorous data validation workflows
- Conducted systematic debugging and testing to ensure performance, reliability, and stability
- Improved usability and efficiency through iterative user-focused enhancements
- Produced detailed technical documentation to support ongoing maintenance and future upgrades
- Completed the full project lifecycle, from initial concept through successful deployment

Technologies Used: Java, REST APIs, SQL, MySQL, Git, system testing

TECHNICAL SKILLS

Programming Languages: Java, C#, Python, Structured Query Language (SQL), PHP (basic)

Web Technologies: Hypertext Markup Language (HTML), Cascading Style Sheets (CSS), JavaScript

Frameworks and Technologies: .NET (basic), Representational State Transfer (REST) Application Programming Interfaces (APIs), Laravel (exposure)

Database Management: MySQL, SQLite, database design, Create Read Update Delete (CRUD) operations, data validation, queries

Mobile Development: Android Development (Java)

Development Tools: Git, GitHub, Android Studio, Visual Studio, PyCharm.

Software Concepts: Software Development Life Cycle (SDLC), system analysis, debugging, testing, version control, requirement gathering, documentation.

Office Applications: Microsoft Office Suite (Word, Excel, PowerPoint).

Other Skills: Data capturing and validation, structured data and reporting, administrative support, troubleshooting, user support.

CORE COMPETENCIES

Strong analytical and logical thinking abilities

Excellent problem-solving and troubleshooting skills

Effective written and verbal communication

Team collaboration and interpersonal skills

Adaptability and willingness to learn new technologies

Attention to detail and commitment to quality

Time management and ability to meet deadlines

Professional conduct and accountability

Customer Service Orientation

Self-motivated with ability to work independently
